raising the bar – and saving trees!

You can help save five trees every day!*

That's right – when you entrust your project to San Francisco Legal, trees that would have been chopped down and ground to a pulp continue to stand tall.

We've Gone Green

In our business, we go through a lot of paper. While we've always been dedicated to recycling, we recently decided to grow our commitment by switching to 30 percent post-consumer paper. This means that for every banker's box of paper we produce for you, 750 of the sheets *aren't* coming from the forest.

Did you know?

- Every day American businesses generate enough paper to circle the Earth 20 times.
- Every year Americans use more than 67 million tons of paper (that's 580 pounds per person).
- Americans toss out enough office/writing paper each year to build a 12-foot wall from Los Angeles to New York City.
- A ton of recycled paper saves more than 3.3 cubic yards of landfill space.
- Roughly, 1.5 acres of rainforest are destroyed every second for crops, pasture and lumber.
- If the current rate of deforestation continues, the world's rainforests will be gone in 40 years.

SF Legal is the smart choice

There's no way around it – businesses need paper. But instead of feeling guilty about it, give yourself a pat on the back. Because just by doing business with San Francisco Legal, you're saving trees and rainforests, too.
